Gold has been making a big splash in home design, showing up in ceilings to light fixtures to wallpaper. The luxe color popped up in new, bold applications at the [2012 International Contemporary Furniture Fair](#) and the [High Point Market](#). Designers got creative when using the classic metallic, marrying it with other on-trend materials like marble and brass for the ultimate chic statement. Let these metallic spaces inspire you to go bold with gold in your home.

Create an entire vignette of gold furniture and accessories. Try using gold almost as a neutral. The metallic hue works with anything when toned down against a black or white background, so you can make a big visual splash without going totally overboard.

Using gold in home design isn't particularly new, but it's usually seen in accessories. Instead, try introducing this glamorous metallic confidently by choosing furniture finished in gold, like these eye-
